Excellence in Engineering

- Project Management
- Installation
- Design
- Sustainable Engineering Solutions
- Technical Advice
- Client Care & End User Support

www.evbullen.com

Established in 1938 by our co-founders John George and Peter Bullen, our company has grown from humble beginnings

to being recognised as leading independent Building Services Contractors providing sustainable, high quality engineering solutions for all types of mechanical and electrical building services.

By utilising the skills, experience and strong management control, E V Bullen offers fully integrated solutions for our clients specific need, requirements and objectives whether for an individual project or a programme of works.

The innovation and quality standards set by our founders are ingrained within E V Bullen and regular training investment ensure we pass on traditional craftsman's skills and learn new technologies for a sustainable future.

Thank you John and Peter.

You're in safe hands...

HV/LV submain distribution and control

...with our mechanical & electrical building service solutions we cover...

The British Library – Kings Tower – sustainable LED lighting

...part or complete service delivery for...

- Commercial heating/boiler installation and distribution
- Mechanical ventilation
- Refrigeration and air conditioning
- Building management control
- Public health services
- HV/LV power distribution
- Lighting installations and systems to meet Government and European target levels of sustainability
- Life and property protection
- Building management specialist systems

Energy efficiency, service delivery, limited timescales, management of risk, quality and cost control are regular challenges facing project delivery in today's market.

How does E V Bullen meet these challenges?

Energy efficiency

Promote and install a wide range of sustainable building services and maintain for a safe and healthy living and working environment. Provide installation payback time scales detailing energy savings on annual fuel bills.

Service delivery

We specialise in detailed project and contract planning by listening to our clients. All mechanical & electrical building services can be selected on an individual basis or provided by E V Bullen as a fully integrated packaged solution to meet all requirements of design, installation and maintenance.

Managed time control

Careful pre-program planning with clients to co-ordinate multi service delivery, identify building/occupant constraints and material delivery timescales. Regular solutions are proposed to improve time scales, e.g. off site fabrication at our storage facilities to improve time scales and reduce trades capacity on site.

Risk and quality management

Our team comprises of fully qualified designers, managers and engineers covering Quality, Risk, Health & Safety, Customer Liaison, Procurement and Administration. Our site supervision and customer liaison teams form an integral part of E V Bullen project delivery, ensuring a high level of project and occupant care.

E V Bullen operative training

Through a programme of involvement E V Bullen managers and engineers are fully trained to exceed industry standards with traditional craftsmen skills and new techniques passed on to future generations, protecting heritage skills and ensuring future quality for our client customers.

E V Bullen recognise their corporate social responsibility role and work with our Clients to cover employment skills, social and environmental issues.

We operate structured NVQ level 3 apprenticeship schemes, with our Blake West short listed for the JTL apprentice of the year.

Well done Blake.
